

# GOVERNMENT SUBSIDY FOR COMMERCIAL eCARGO BIKES – WE’LL ASSIST YOU IN APPLYING!

## THE FOUR STEPS OF RECEIVING A GRANT

We’ll show you the steps to follow in order to receive a subsidy for purchasing your electric U-Mobility CARGO.

Please note: this process generally applies to all federal and state subsidy programmes in Germany. However, it may differ at municipal level.

### 1. Get your offer with us.

Write an email with ‘Commercial funding’ in the subject line to [umobility@mubea.com](mailto:umobility@mubea.com).

Please provide us with the following information:

- name of the funding programme
- desired number of vehicles
- your contact details (name and address)

You will then receive your non-binding offer by email.

### 2. Submit your application to the respective granting authority.

In many cases, you can apply online. An example: BAFA subsidy ([www.bafa.de](http://www.bafa.de)) for commercially used eCargo bikes.

Required documents\*:

- non-binding offer
- project description

Avoid delays caused by queries by following these steps very carefully.

### 3. Following a successful verification, you will receive your funding notification from your granting authority.

**Congratulations!**

### 4. Buy your U-Mobility CARGO\*\*

Use the invoice you receive with the delivery of your eCargo bike to request payment of the grant from the granting authority (see point 2).

### Payment of the grant

\* Requirements/documentation varies by funding programme.

\*\*The time limit between receipt of the funding notification and purchase of the vehicle varies according to the grant programme. In some cases, the purchase has to be made prior to applying for funding.
